

## Ski Design/Build Course

### Course Description:

Learn to design then build your own pair of custom skis. You will start with design, choose graphics, then use jigs and power tools to shape and profile your skis. We will select fiberglass and will wet lay up the ski using epoxy and a vacuum bag process.

### Course objectives:

- Learn the process of ski design
- Gain knowledge for the safe operation of various tools
- Create a unique ski to fit your style

### Class Schedule:

Course generally takes 16 hours to complete. Times are flexible. Contact Instructor.

### Tools/Materials to Bring:

- Safety glasses and ear protection
- Older clothing (If you get epoxy on it, it won't come off!)
